

Having thus described and illustrated my new variety of grapevine, what I claim as new and desire to be secured by Plant Letters Patent is:

1. A new and distinct variety of grapevine substantially as illustrated and described which is somewhat remotely similar to the "Thompson Seedless" grapevine, but from which it is distinguished in a number of respects including by producing fruit which is mature for commercial harvesting and shipment approximately in mid October in the San Joaquin Valley of central California and which has firm, medium to large berries of light green skin coloration which are seedless and with a mild flavor and crisp flesh.
